

Victor Ubisi

Curriculum Vitae (CV)

What job i'm looking for? My positive points

At my previous place of employment, Barloworld Equipment, I was commended many times for my ability of working efficiently with qualified mechanics to diagnose and fix problems affecting various types of machines. On several occasions, I was left to do general preventive maintenance, including minor parts replacements.

In my previous position, my supervisor would also have me order parts and service kit for qualified mechanics when they are on site, and I would drive to various sites to deliver parts and or to work with my lead mechanics. During my rotations as an apprentice, I had already started with component assemble for components such as engines, transmissions, differentials, and many other small components, as well as hydraulic system.
