

Bongani Matli

Curriculum Vitae (CV)

What job i'm looking for? My positive points

Electrical Engineering.

Working with electricity is a fulfilling career because it requires an electrician to have a good working knowledge of the relevant electric codes. Electrical work does not get tedious, because every day brings something new and fresh to the profession and to us that are willing to learn more about electrical industry of the field.

Working in the industry of electrical it was my wish as i also took a step forward to study for an electrical. And my experience in industrial electrical systems makes me a great fit to this job as i recently worked with few companies on the site of construction. As to become a good stand of electrical industry I leant a lot about willingness to learn as for knowledge that I must be familiar with and also the ability to seek out, learn and retain the knowledge as the key.

Therefore there is much that i have adapted in the industry of electricity as far as mental and physical aptitude, good communication, sense of adventure, customer service, time management, perseverance, team player and safety first mindset as showing all the capability that I have little I think it would be crucial also to gain more in this industry am appealing for.
