Curriculum Vitae (CV)

What job i'm looking for? My positive points

I studied civil engineering but haven't been on site the only things I know is theoretical but practically I know nothing. I'm interested in civil engineering. I mean let's look around our universe is beautiful because of engineering.

One thing about me is that I'm a hard worker , I work very well under pressure for example now I'm a delivery lady I will be driving while talking to a client(difficult client for that matter) busy searching for the address and running away from the hijacker's I mean it's lot but here I am still doing the job with my best ability. My only weakness is that when i do something I put all focus in, is like I become addicted and I will ask questions trust me I will because I don't like doing something I don't understand
