## What job i'm looking for? My positive points

I am looking for any job relating to electrical engineering as I come from a technical school and from grade 10 - 12 I did science combined with technical subjects(Electrical technology and Engineering graphics & design) right now I'm a final year student at the Central university of technology in Bloemfontein completing my Bachelor of engineering technology in electrical engineering. I have never had a job based on electrical engineering but I regard myself as having experience because a lot of the work I did as a student was practical based and I also completed a 42 credit project during my final year but I'm still eager to learn. During high school when I was doing Electrical technology I specialised in digital systems/ electronics and I also took part in the columba leadership academy in 2016 from that which I was well equipped with necessary skills to be a columba leadership leader throughout my high-school years. From 2017-2019 as a member of columba leadership we had a project where we were trying to fight substance abuse and other issues learners faced within the school. I also did computer networks(cisco networkig academy: 1. CCNA: Introduction to networks and 2. CCNA: Switching, Routing and Wireless essentials) and Engineering programming(Arduino-C and Processing) plus Assembly language in Digital technology. I am a disciplined, adaptable, flawless and responsible young man. I learn fast, I am a hard-worker full of perseverance and I am looking forward to gain experience from any job opportunity that is available.
