

Luvhengo Christinah Netshiendeulu

Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am a young woman who has Bachelor of Science degree majoring in Biochemistry and Microbiology. I am asking for an opportunity that will help me explore my career.

My undergraduate degree has exposed to skills where I can perform laboratory tests in order to produce reliable and precise data to support scientific investigations; carry out routine tasks accurately and following strict methodologies to carry out analyses, collecting; preparing or testing specimens and samples; operate and maintain standard laboratory equipment such as microscope, centrifuges, titrators and pipetting machines; record and interpret results to present to senior stuff; compile information into graphs and documents; and etc.

As a university student I have learnt how to work with other students as a group, sharing ideas and knowledge that we have. I know how to work under pressure, and I always manage to meet my deadline through multi-tasking and making time for my work. I pay attention to details, I am a hard worker, I can work overtime and I am able to write a standard report. I have code 10 vehicle and I am immediately for available for any opportunity to learn, adapt and perform duties independently, when given the opportunity.
