Work experience

Working period	nuo 2022.04 iki 2023.12
Company name	AUTOLIV SOUTHERN AFRICA
You were working at:	Engineers
Occupation	CYCLE COUNTER
What you did at this job position?	Cycle counting is a method of inventory control that involves counting a small number of items from the inventory on a regular basis. Cycle counting allows for more frequent and accurate inventory updates, and can be used to detect discrepancies in the inventory count. An inventory cycle count, a process that requires you to count a small amount of your inventory at a specific time, usually on a set day, without handling your entire stock in one go. It's a type of inventory auditing method that ensures your inventory is accurate and up to date at all time. The purpose of cycle counting is to identify and rectify inventory inconsistencies and help manufacturers perform better compared to industry benchmarks. Cycle counting confirms the accuracy of inventory levels. There are four different to-level inventory types: raw materials, work-in-progress (WIP), merchandise and supplies, and finished goods. Components/Merchandise are like raw materials in that they are the materials a company uses to create and finish products, except that they remain recognizable when the product is completed, such as a screw.
