Curriculum Vitae (CV)

## What job i'm looking for? My positive points

I am a Graduate with the Durban university of Technology, I currently don't have any industry experience but I'm very good with computers. In my spare time I play around HTML webpages, MySql and a little MVC. However I do have knowledge of Java and a little python, I believe that I still have to be exposed to professionals and witness them at work with hopes that I'll pick up a few things too. I am looking for a workplace that's going to allow me to be able to grow too and be much better at what I do.
