Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am currently coming from self employment looking for a job back into IT - Disaster Recovery related opportunities.

I always work to maximise my potential in everything i do. I have grown from an entry level Operations Analyst to a Solutions Architect specifically responsible for Disaster Recovery Services. In my past 15 IT years experience, i have more than 5 years Disaster Recovery experience and a total of 15 years IT experience.

My previous job was at the South African Post office as an Infrastructure Solutions Specialist for 3 years, looking specifically at Disaster Recovery and Business Continuity solutions. Prior to working for the Post Office, i was a Solutions Architect at T-systems, responsible for DR Services. Before pursuing a Solutions Architect Position at T-Systems, i was a Disaster Recovery Specialist at T-systems and Arivia-kom. I have the experience in IT Security, which was the area that gave me interest to move into the Disaster Recovery space. For detailed career information, please refer to the attached CV.

I am currently unemployed as i had decided to pursue my interest in Retail business, which unfortunately did not succeed. I am now available to go back to the Disaster Recovery environment, which is the area in my career that i have passion for and have extensive knowledge and experience.
