

Bilal Abdul Quddus Mughal

Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am a hard worker person and have a skills to work under pressure. To accomplish a task I fight until my last try. I like to work as an engineer, such as production engineer and manufacturing. Also as Industrial safety as well.

Another quality is to find a root cause of a problem. I start my search level from lower level (Root) to higher level to analyze and understand the whole system. Then make plans to reduce errors and improve the process to increase the profit.

Also I have a skills to be a team leader, and prefer to participate with them in work. My way of leading a team is to understand each other and have a better communication with them.

I like to communicate face to face instead of phone calls or by emails. It adds more skills and encouragement in me to deal with people.

Last but not least If a challenge is tough, I work overtime to complete it within a given time frame.

Preferred occupation	Engineers Engineering jobs
Preferred work location	Bloemfontein Free State
