What job i'm looking for? My positive points

I'm looking for diesel mechanic job but I would prefer to start as an assistant. I have never worked in a mine, so that would be great to get the chance to work in a mine.

I'm a very fast learner and a hard worker who's willing to do anything for the company.

Experience I have I got it while I was doing a learnership in 2016 was maintaining of trucks i.e. servicing trucks, diagnostic of trucks, visual inspection, fault findings, remove and replace gearbox, engines and repair selected electrical components.

I would be looking forward to hear from you and thank you for consideration.

Kind regards
